Awards, Accolades and Ratings

*Greenest
Automaker*

Honda has a long history of environmental leadership, including the introduction of America's first mass-produced hybrid, the [original] Honda Insight, and the first vehicle to meet California's Low-Emission Vehicle standards, 1996 Civic well in advance of regulatory requirements. Acknowledgment of our commitment to innovation can be seen by Honda's topping the rankings as the country's greenest automaker by the Union of Concerned Scientists (UCS)—for the fifth consecutive year[1].

[1]Based on a Union of Concerned Scientists analysis of fleetwide global warming and smog emissions from 2008 model year vehicles.

INTERACTIVE NETWORK

Electric Power Steering (EPS) on Every Model

EPS was previously on Si models only. For 2012, all Civic models are equipped with EPS.

Vehicle Stability Assist (VSA) on Every Model

Vehicle stability assist with built-in yaw sensor is on every 2012 Civic models.

One-motion Interior Door Handle

Both front interior door handles will unlock and open the door with one pull of the handle. The 2012 Civic is the first Honda model with this feature. This convenience requires that front seat passengers never pull a front door handle while the vehicle is in motion.
